Instructor Interest Guide

Grow Your Skills & Enable Your Teams

Worldwide DevOps interest and adoption is growing at a rapid pace and with it comes the need for enterprises to educate their teams on DevOps principles and practices.

As the Association for DevOps Professionals, DevOps Institute is dedicated to advancing the human elements of DevOps and relies on qualified Instructors to support Skilling Up professionals.

As a global member-based professional association, DevOps Institute sits at the heart of an open and growing community comprised of IT professionals, education partners, trainers, consultants, talent acquisition and business executives; helping pave the way in support of organizational digital and human transformation.

INSTITUTE
ADVANCING THE HUMANS OF DEVOPS

SKIL Framework

Instructors will help advance careers and support emerging practices within the DevOps community based on a human-centered **SKIL Framework, consisting of Skills, Knowledge, Ideas, and Learning.**

As an Instructor, you will be equipped with and have access to all our work, including accreditations, research, access to events and continuous learning programs which are focused on providing the "human know-how" to modernize IT and make DevOps succeed.

"**The SKIL Framework** represents our holistic ecosystem of knowledge and learning that will continue to grow as we develop and curate the industry's best thinking and make it readily available to the DevOps community. The thirst for DevOps skills and knowledge is incredibly strong."

The SKIL Framework includes four key elements for advancing the Humans of DevOps:

Skills: DevOps Institute has helped with the Upskilling of thousands of IT practitioners and professionals through enterprise-level and role-based accreditations and certifications curated by industry thought leaders, delivered by expert Instructors. It rigorously researches and curates open-source values to help members build and navigate career paths and take advantage of exclusive job boards and opportunities.

Knowledge: Helps guide organizations and members through research and premium thought-leadership content, videos, webinars, podcasts, eBooks, blogs and published articles. It is a trusted resource for all IT professionals interested in leveraging community-based principles to improve their personal and organizational performance.

Ideas: Promotes dialogue and exploratory activities that illuminate the benefits of applying DevOps skills. Members have access to relevant forums, LIVE & Virtual events and local MeetUps to network and foster ideas for success.

Learning: Promotes continuous learning and provides members with access to relevant content via webinars, online learning, podcasts, books, workshops and bite-size learning programs to support the continuous learning journey.

Together, the SKIL Framework provides the trusted resources needed to adopt and scale DevOps practices based on shared knowledge.

Collective Body of Knowledge (CBOK)

DevOps is based on a collective body of knowledge and DevOps Institute actively researches and influences emerging DevOps practices and is the ONLY organization that continuously improves and updates the course materials based on the latest developments in the market to create meaningful training and certification experiences for everyone, including materials from the following sources:

2019 Upskilling: Enterprise DevOps Skills Report - DevOps Institute

2019 State of DevOps Report - Puppet Labs, CircleCI & Splunk

2019 Accelerate: State of DevOps report - DORA and Google

Criteria for becoming an Accredited Instructor

The DevOps Institute Instructor Program provides individuals and organizations with resources and opportunities to grow the business while supporting client needs in a manner that makes sense for everyone through minimal barriers to entry while ensuring quality course deliveries.

To become an accredited instructor, an applicant will need to:

- Have demonstrable experience, credentials, and subject matter expertise on the course topic
- Have at least one year of active proven training experience or extensive DevOps experience
- Successfully pass (or have passed) the appropriate course certification with a minimum of 65%
- $200 USD annual Instructor accreditation fee (Accredited Instructors will receive self-study materials and one exam voucher, additional self-study materials can be requested and discounts provided for additional exam vouchers).
- If Instructor is not engaged with a defined Education Partner, will need to also be set-up as a Partner

Instructor Terms and Conditions

- Execute and abide by the Instructor agreement
- Proudly, ethically, professionally, and legally represent the DevOps Institute
- Comply with all DevOps Institute policies, guidelines, and intellectual property usage requirements
- Ensure that only DevOps Institute approved, and accredited courseware is leveraged, for course deliveries
- Make payments to DevOps Institute on time and accordingly to the terms of the Instructor agreement
- Promptly notify DevOps Institute of any infringement or unauthorized use of DevOps Institute materials, logos or property
- Ensure a high-quality learner experience
    - Ensure the quality of training by offering learner surveys and other feedback mechanisms
    - Provide DevOps Institute feedback on courseware and learning experience to ensure continuous improvement
    - Ensure each learner meets the eligibility requirements before authorizing a certification exam
    - Do not extract, copy, print or distribute DevOps Institute courseware outside of the Partner agreement
    - Use social media responsibly, following the DevOps Institute Code of Conduct
