## PLUTORA<sub>®</sub>

Moving Beyond Story Points with Value Stream Flow Metrics

## Agenda

- 1. Why care about value stream flow metrics
- 2. What are the value stream flow metrics?
- 3. How do you calculate them?
- 4. What to interpret them?

# Speaker

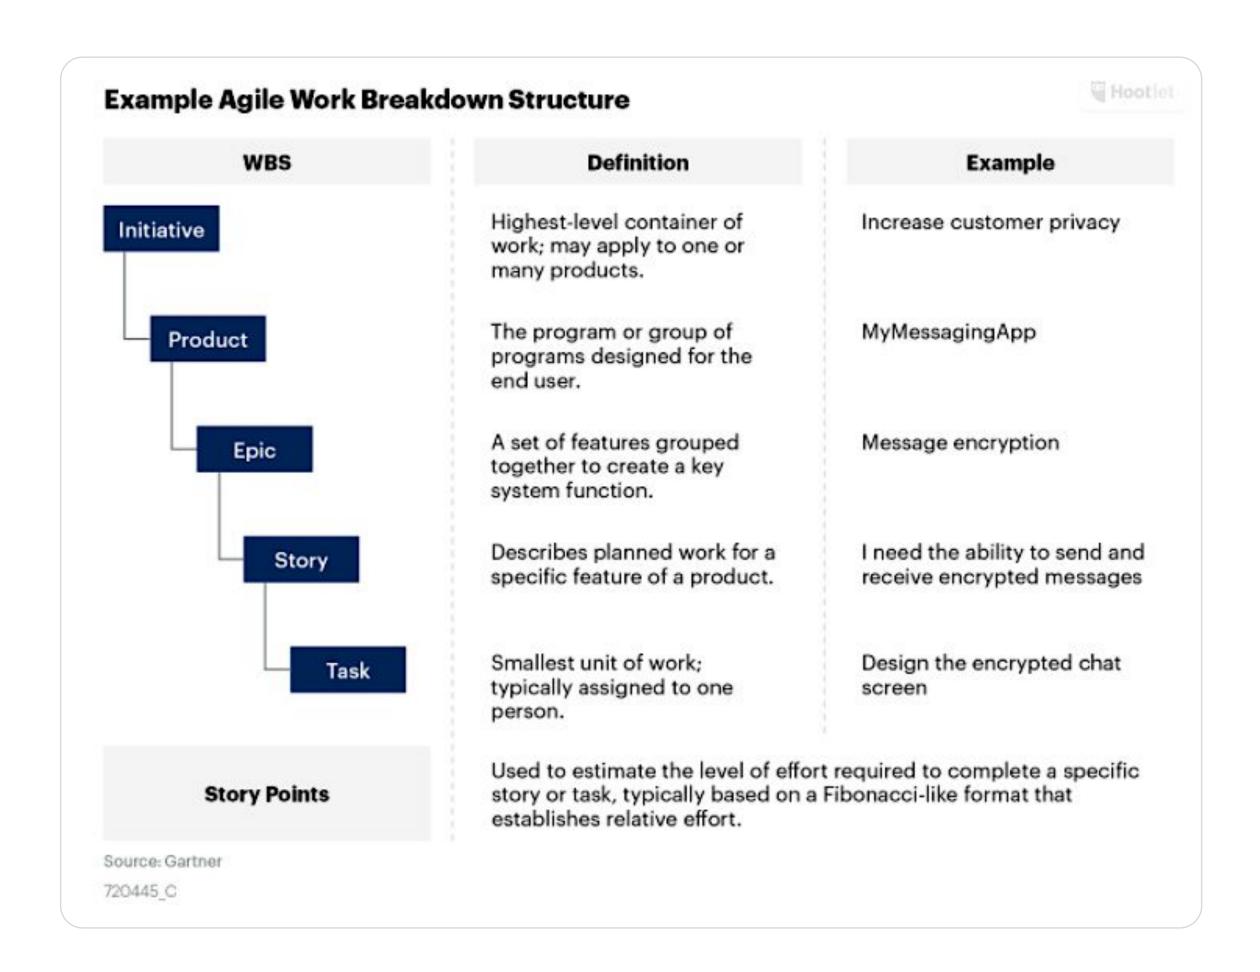

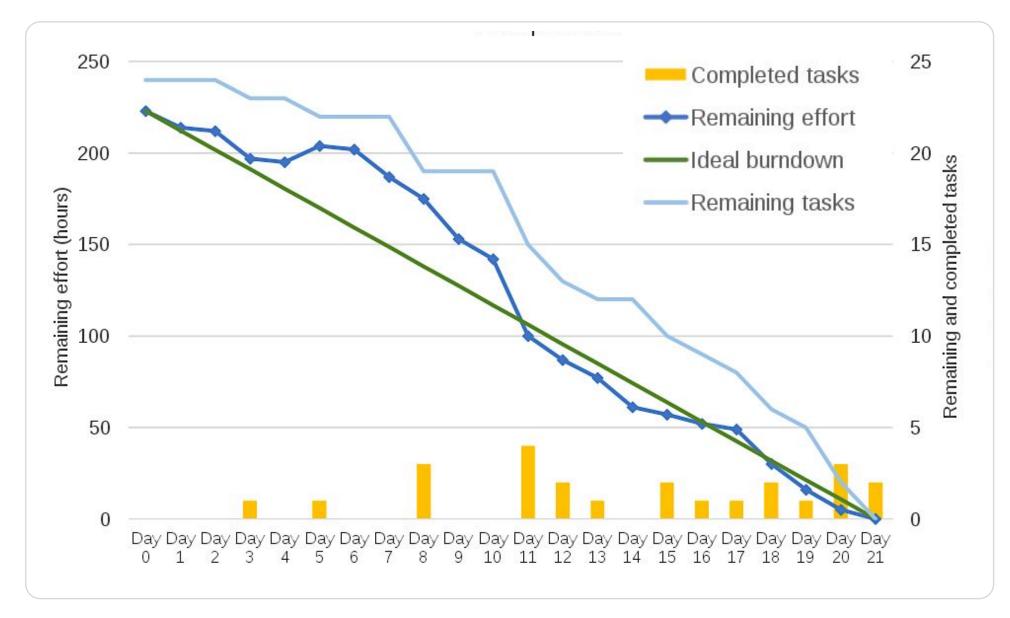

Jeff Keyes
VP of Product
@jeffkeyes

Jeff is VP of Product at the value stream management platform, Plutora and an ambassador and the DevOps Institute. He has spent his career writing code, designing software features and UI, running dev and test teams, consulting and evangelizing DevOps and value stream management. Outside of six years at Microsoft, he has been primarily focused on growing startup companies.

## The Problem

We want to have metrics that describe "how are we doing?"

C-Suite

Think About: Productivity

Waste

The Business

**Think About:** Speed & Outcomes

Time, Revenue, Retention

**Think About:** Outputs and Process

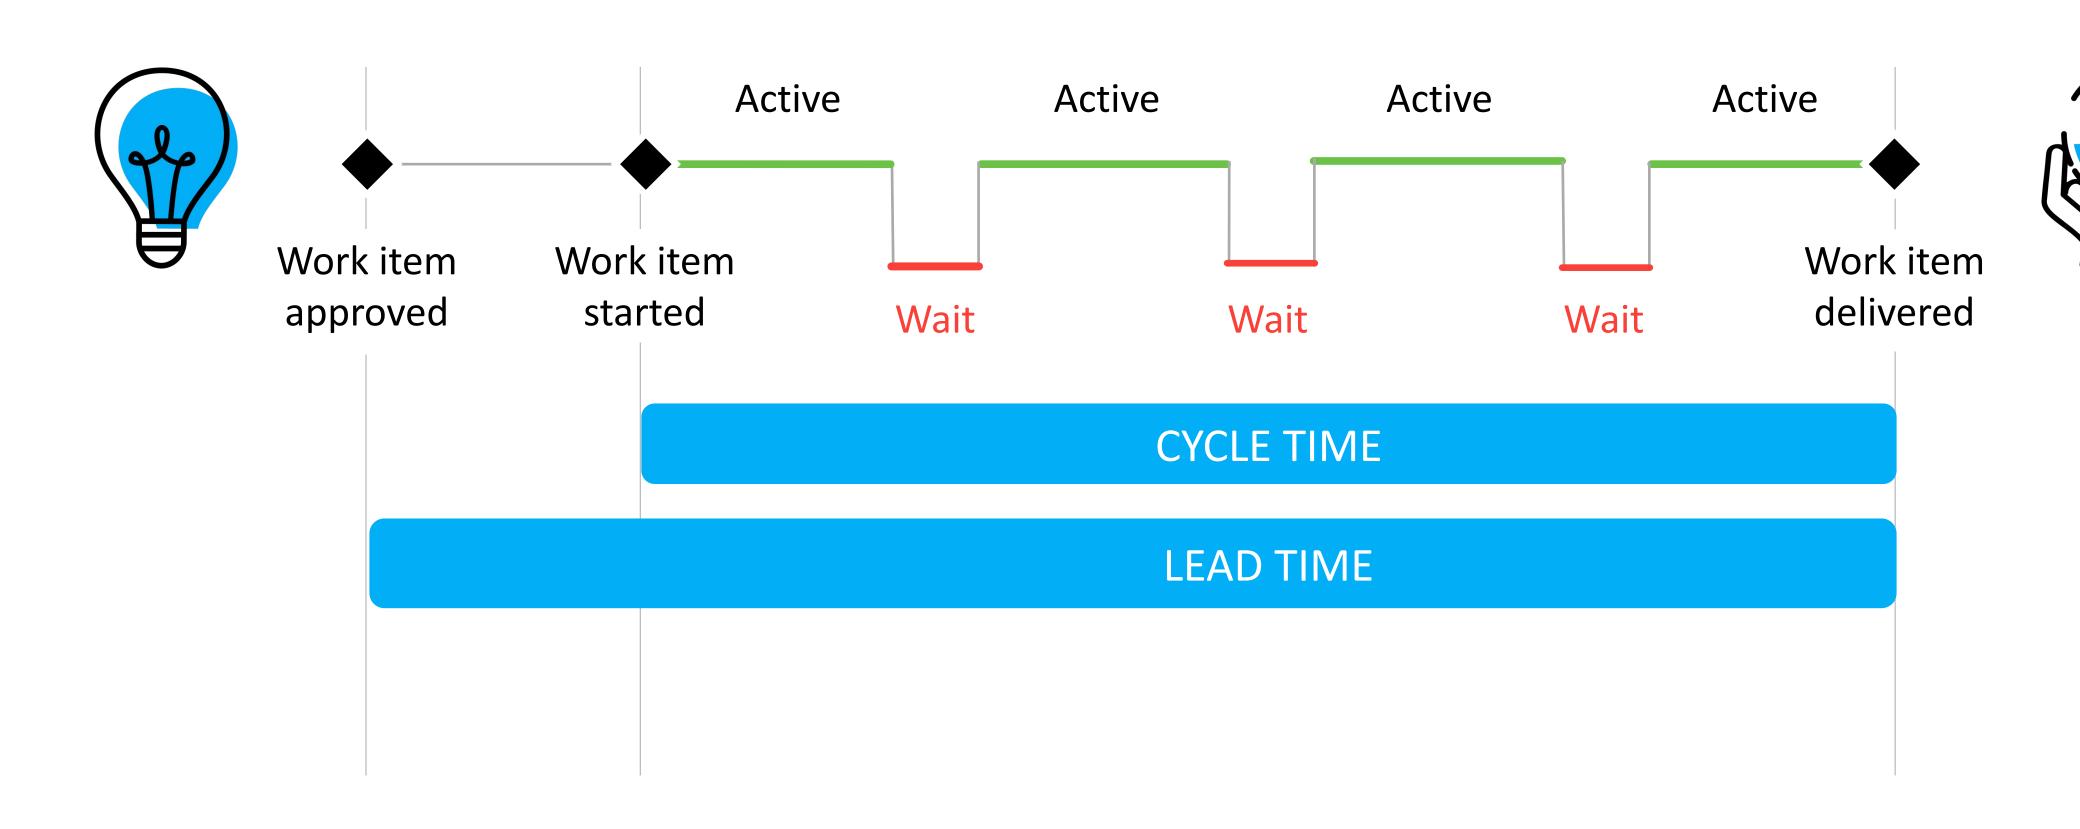

**Story Points** 

# DevOps Metrics

Metric	Definition					
Deployment frequency	How often code is deployed to production in a team's value stream (product or service)					
Lead time	How long it takes from code committed to code successfully running in production for the team's value stream					
MTTR	How long it takes to restore service when a service incident or a defect that impacts users occurs (e.g., unplanned outage or service impairment) within the team's value stream					
Change fail rate	The percentage of changes to production that results in degraded service (e.g., lead to service impairment or service outage) and subsequently require remediation (e.g., require a hotfix, rollback, fix forward, patch) within the team's value stream.					

## VSM Flow Metrics

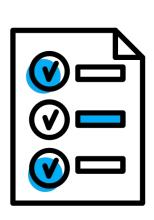

## Value Stream Flow Metrics - Idea to Cash

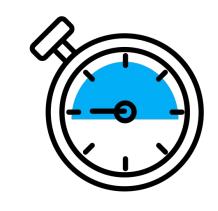

#### **LEAD TIME**

Time to customer value from approval to delivery

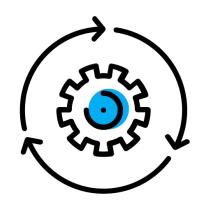

#### **THROUGHPUT**

Work items
completed in a
value stream for
a given time
period

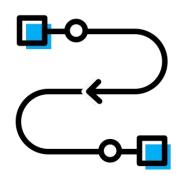

#### **WORK EFFICIENCY**

Proportion of time that work item is active vs. the total cycle time

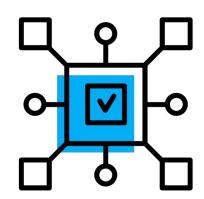

#### **CYCLE TIME**

Total time from when work was started to when it was completed

## WORK IN PROGRESS

Total number of work items active or waiting in a value stream

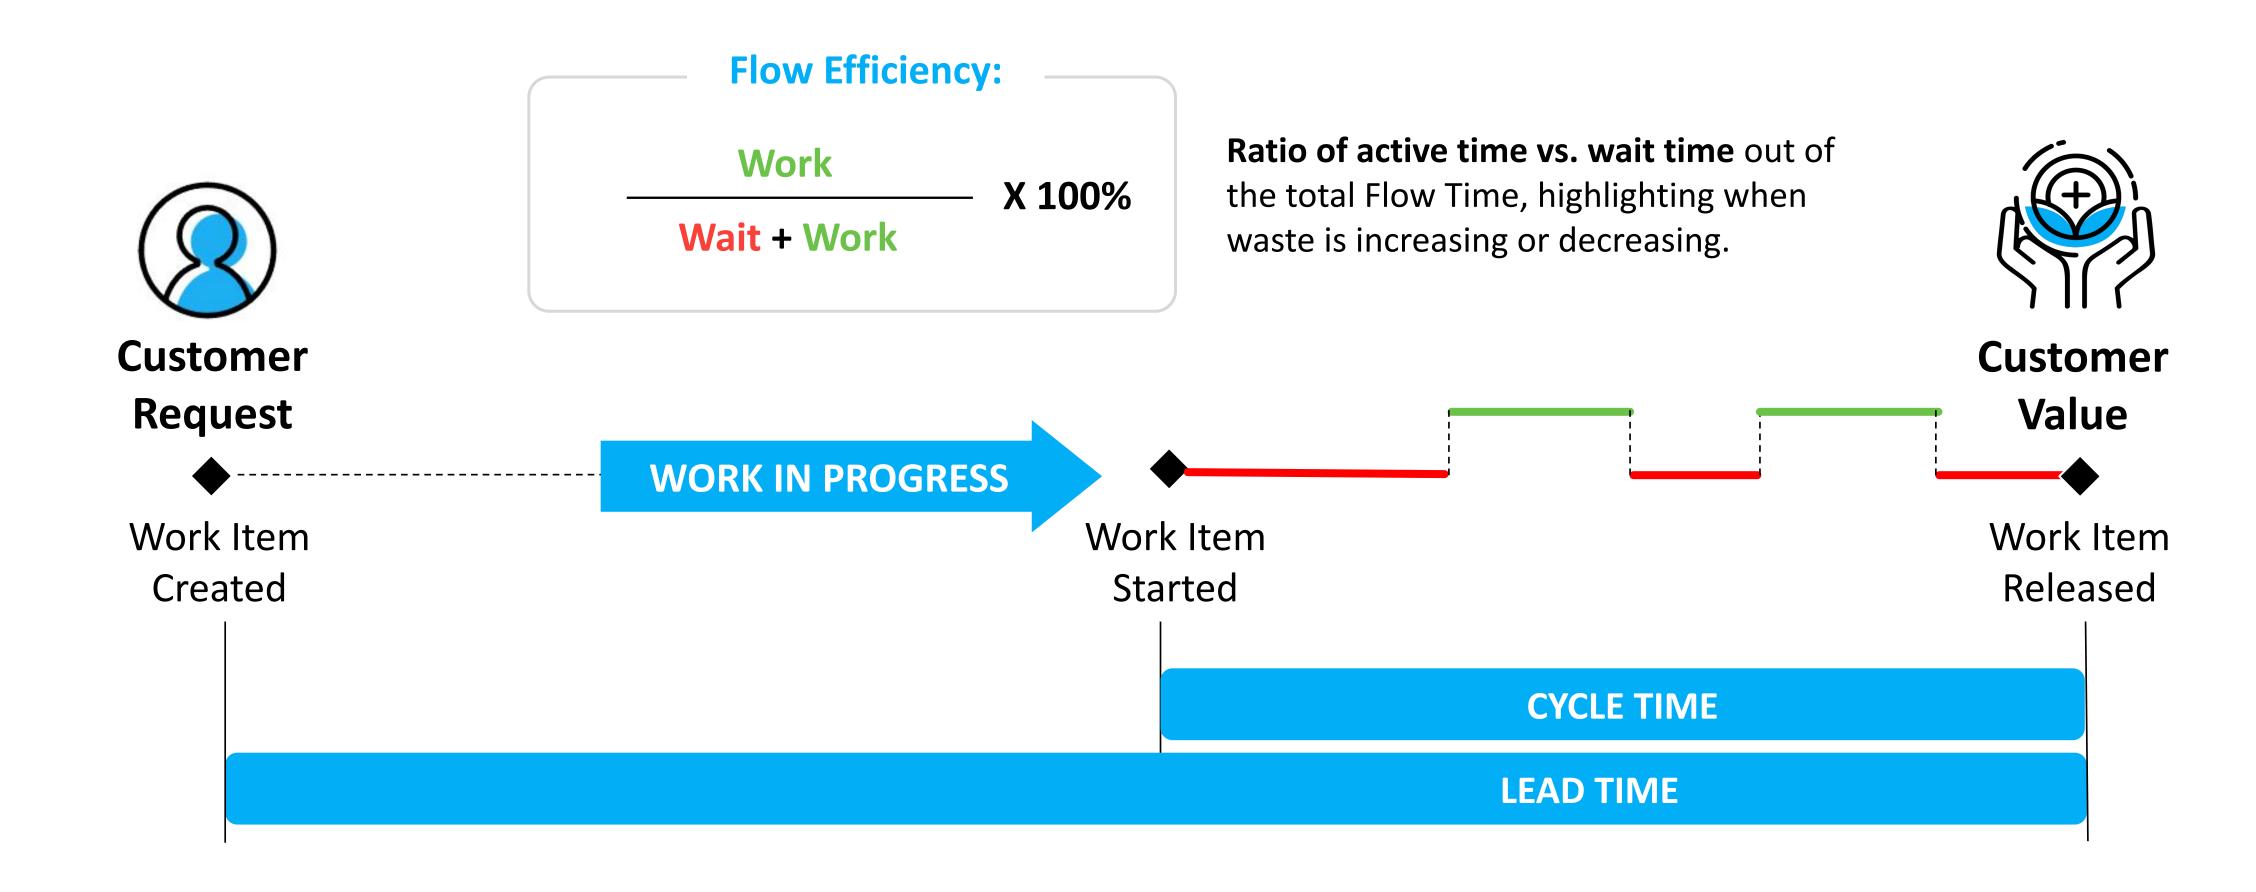

#### WORK BREAKDOWN

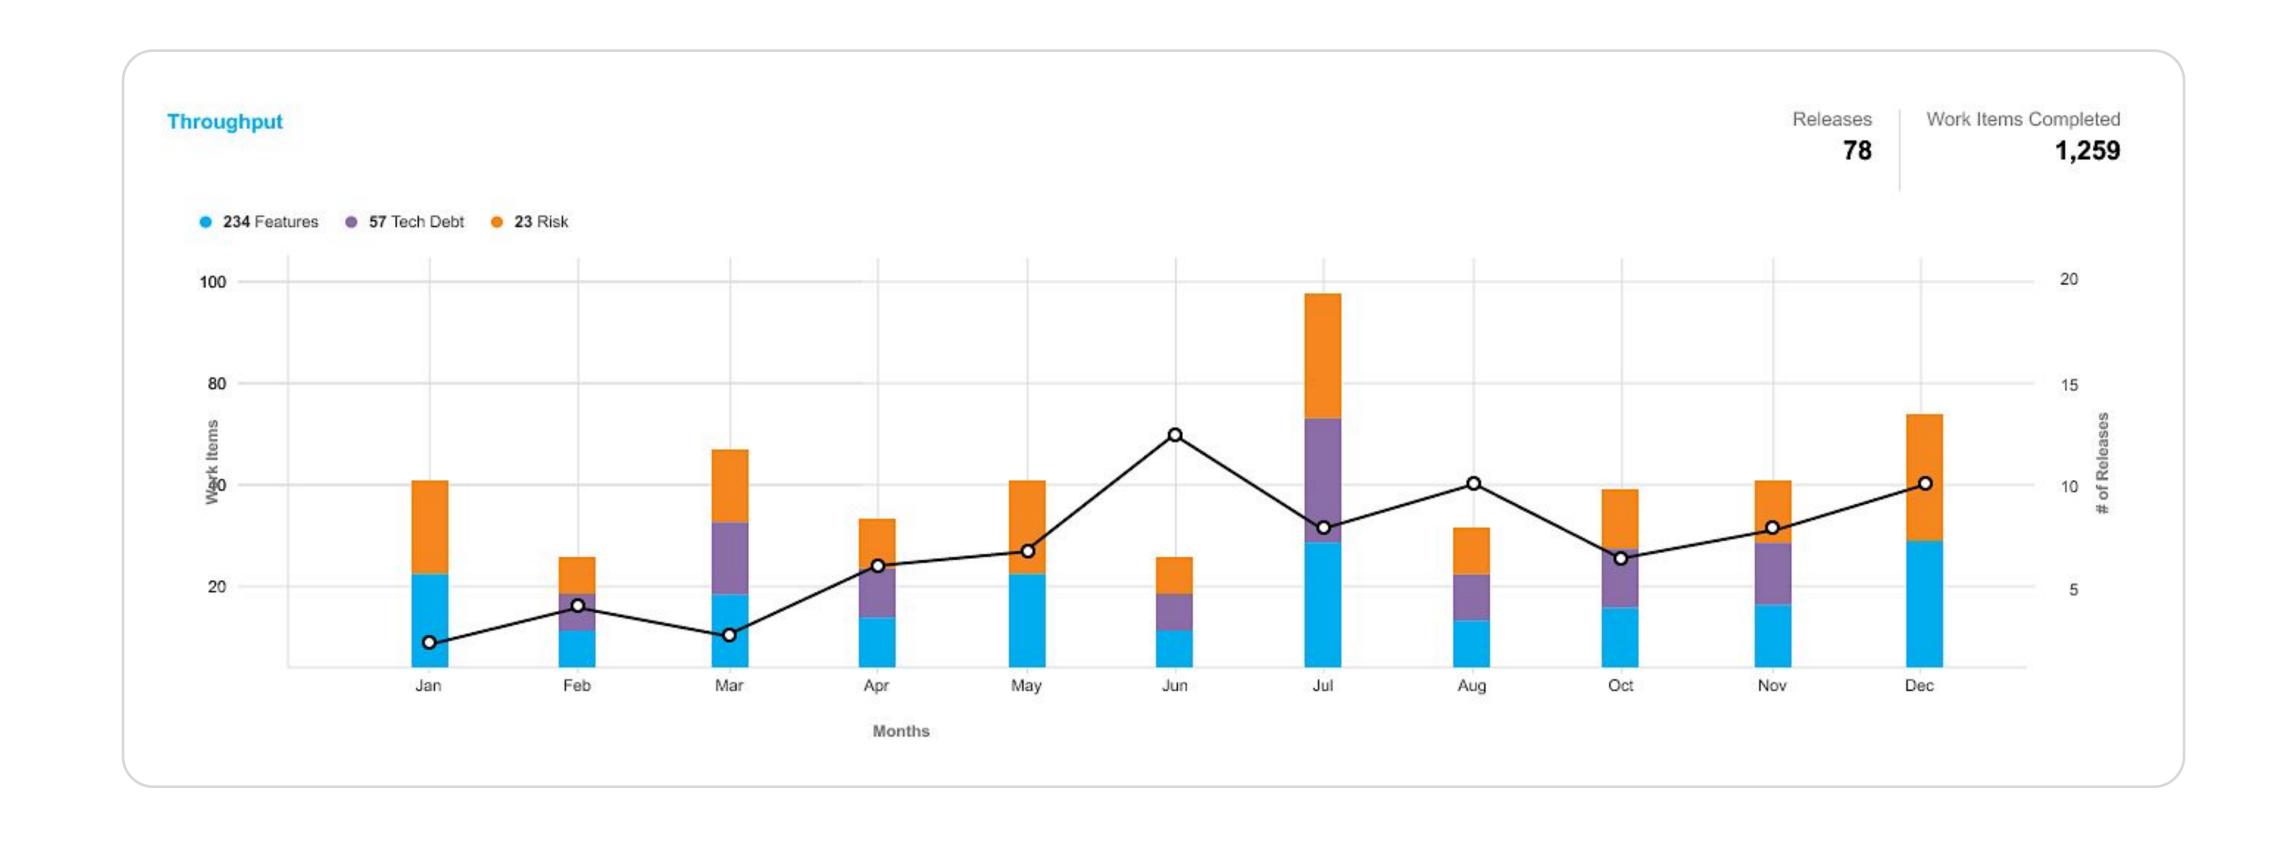

The proportion of work item types (feature, defect, etc.) within a value stream

## Lead Time, Cycle Time, and Efficiency

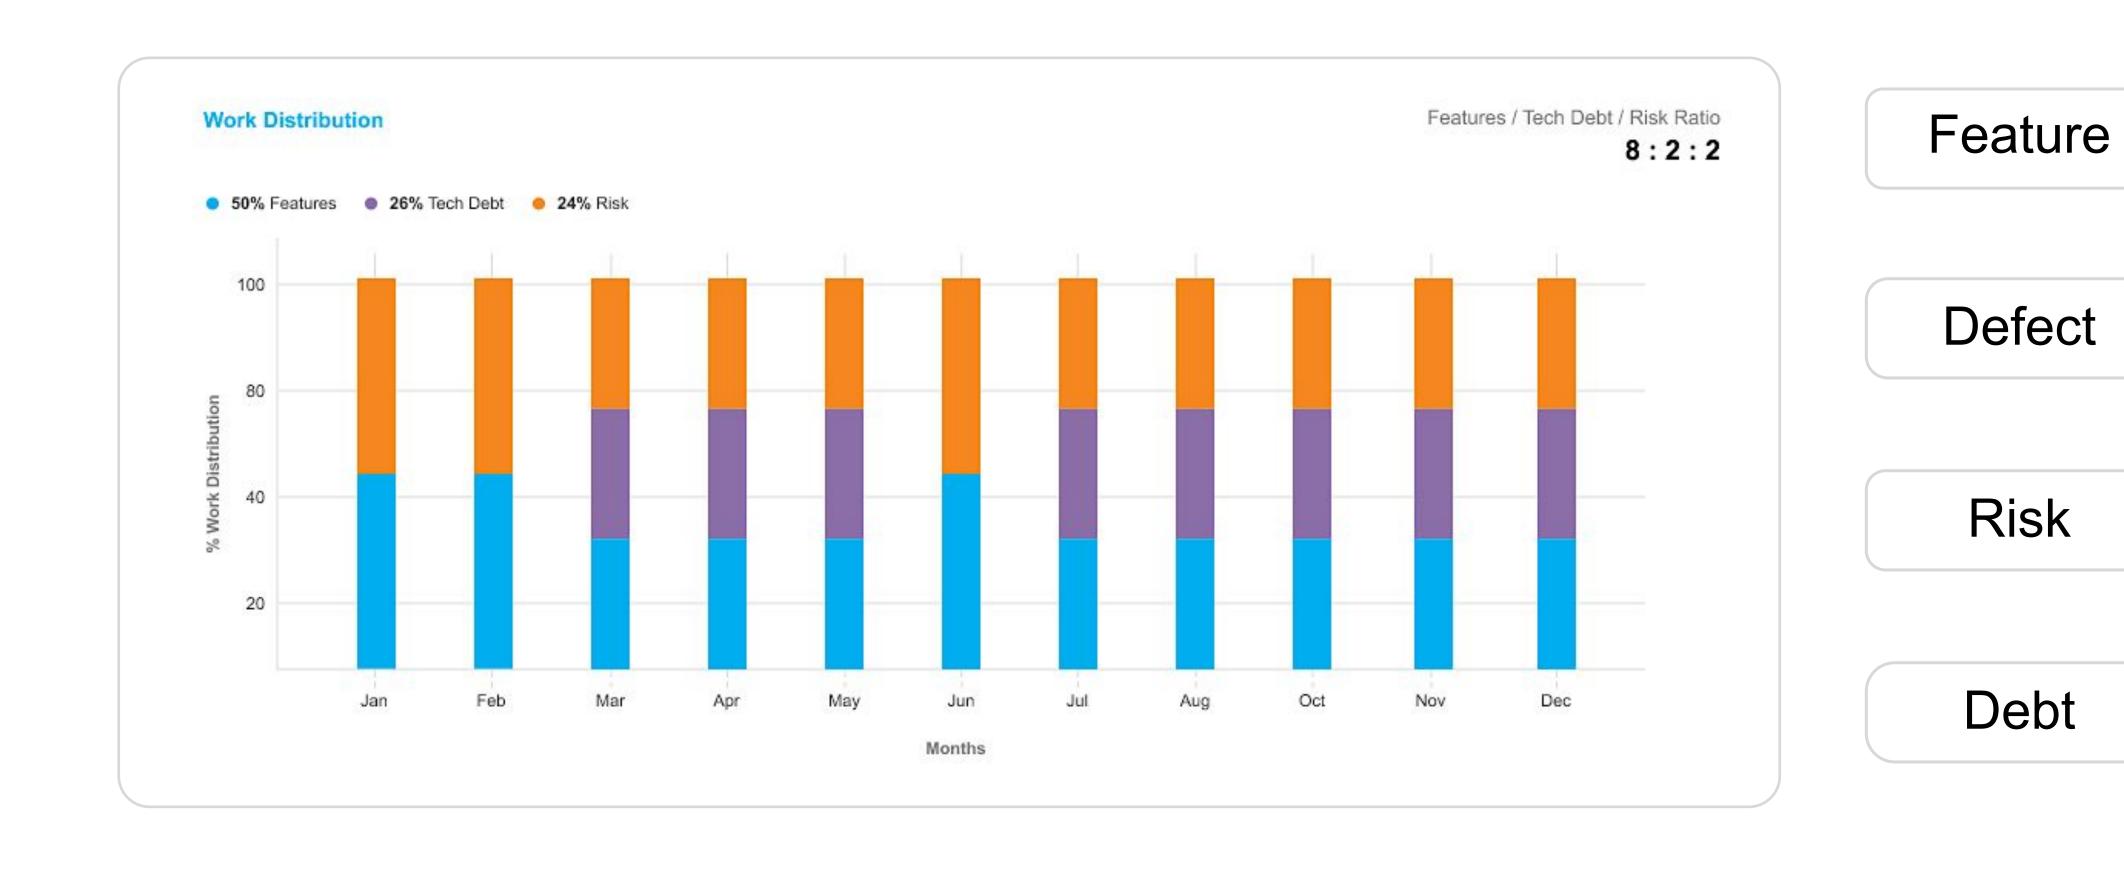

Value Stream flow metrics describe how your value stream work if flowing, releasing, and its stability

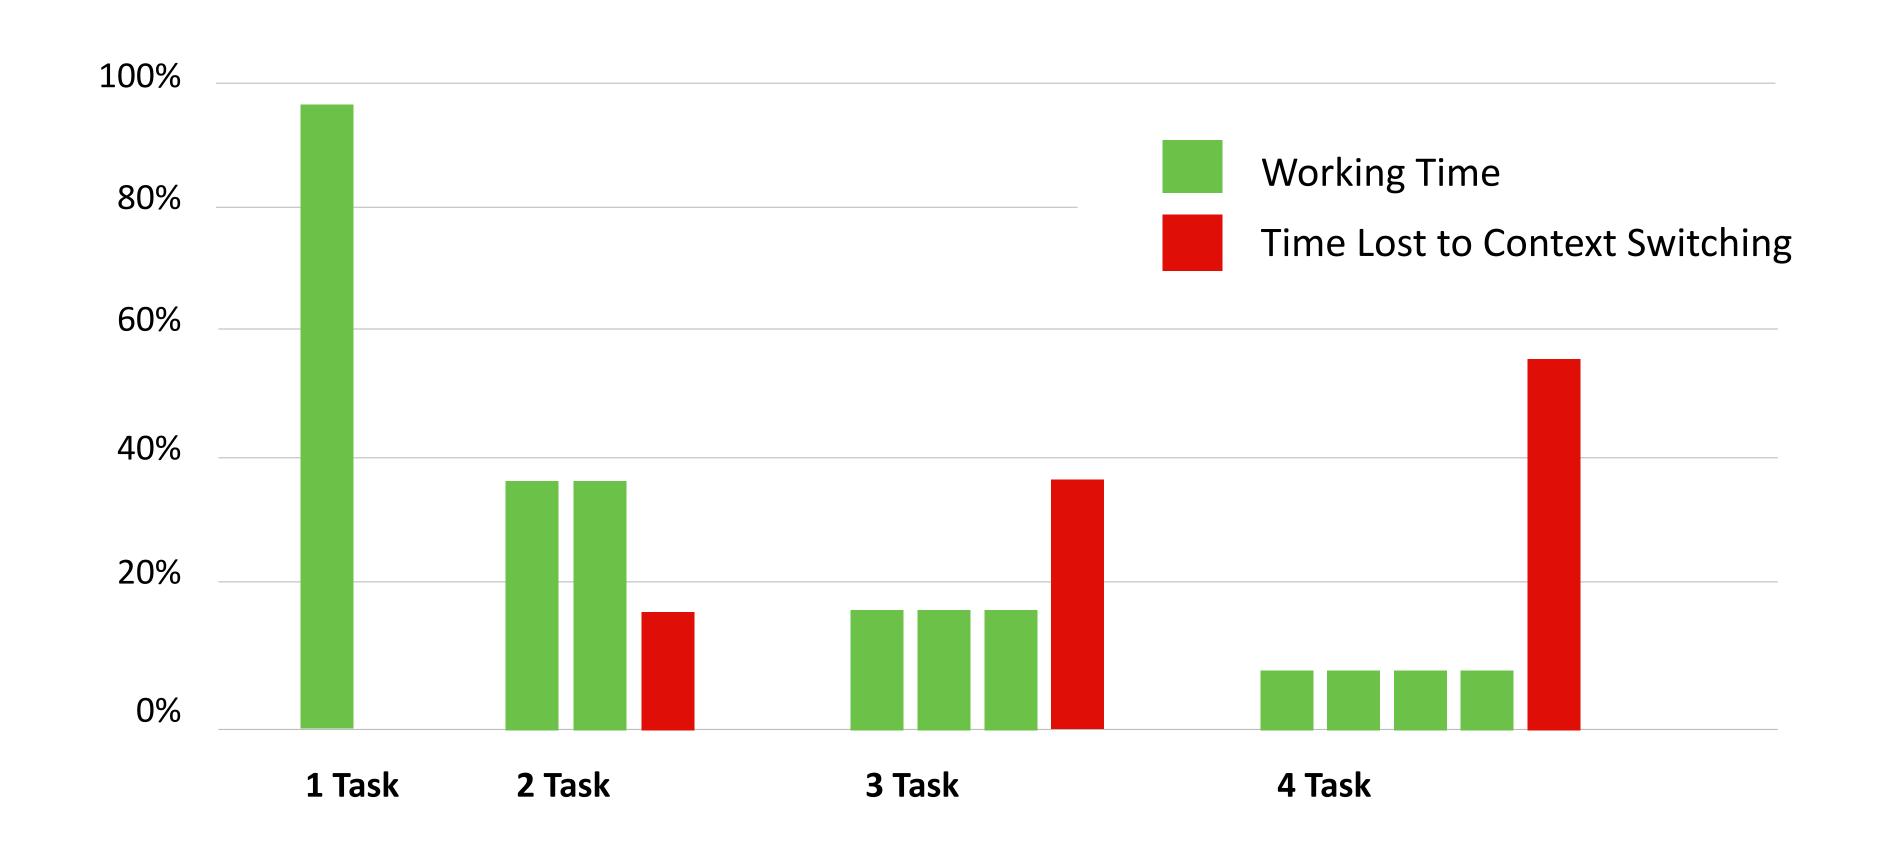

# Throughput

## Work Breakdown

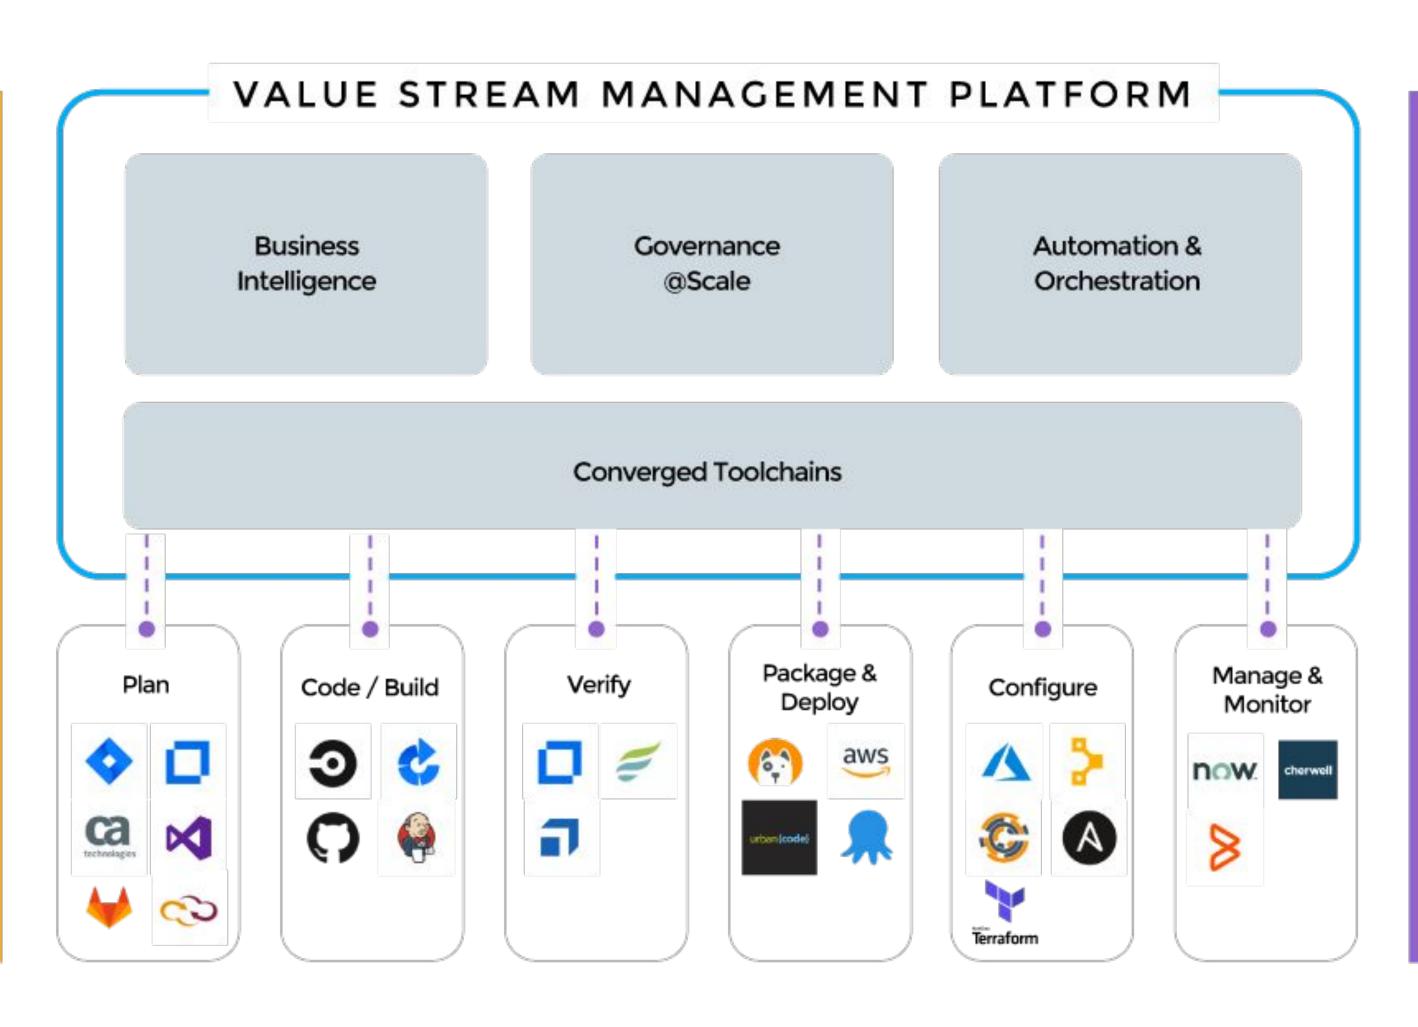

# Work in Progress (WiP)

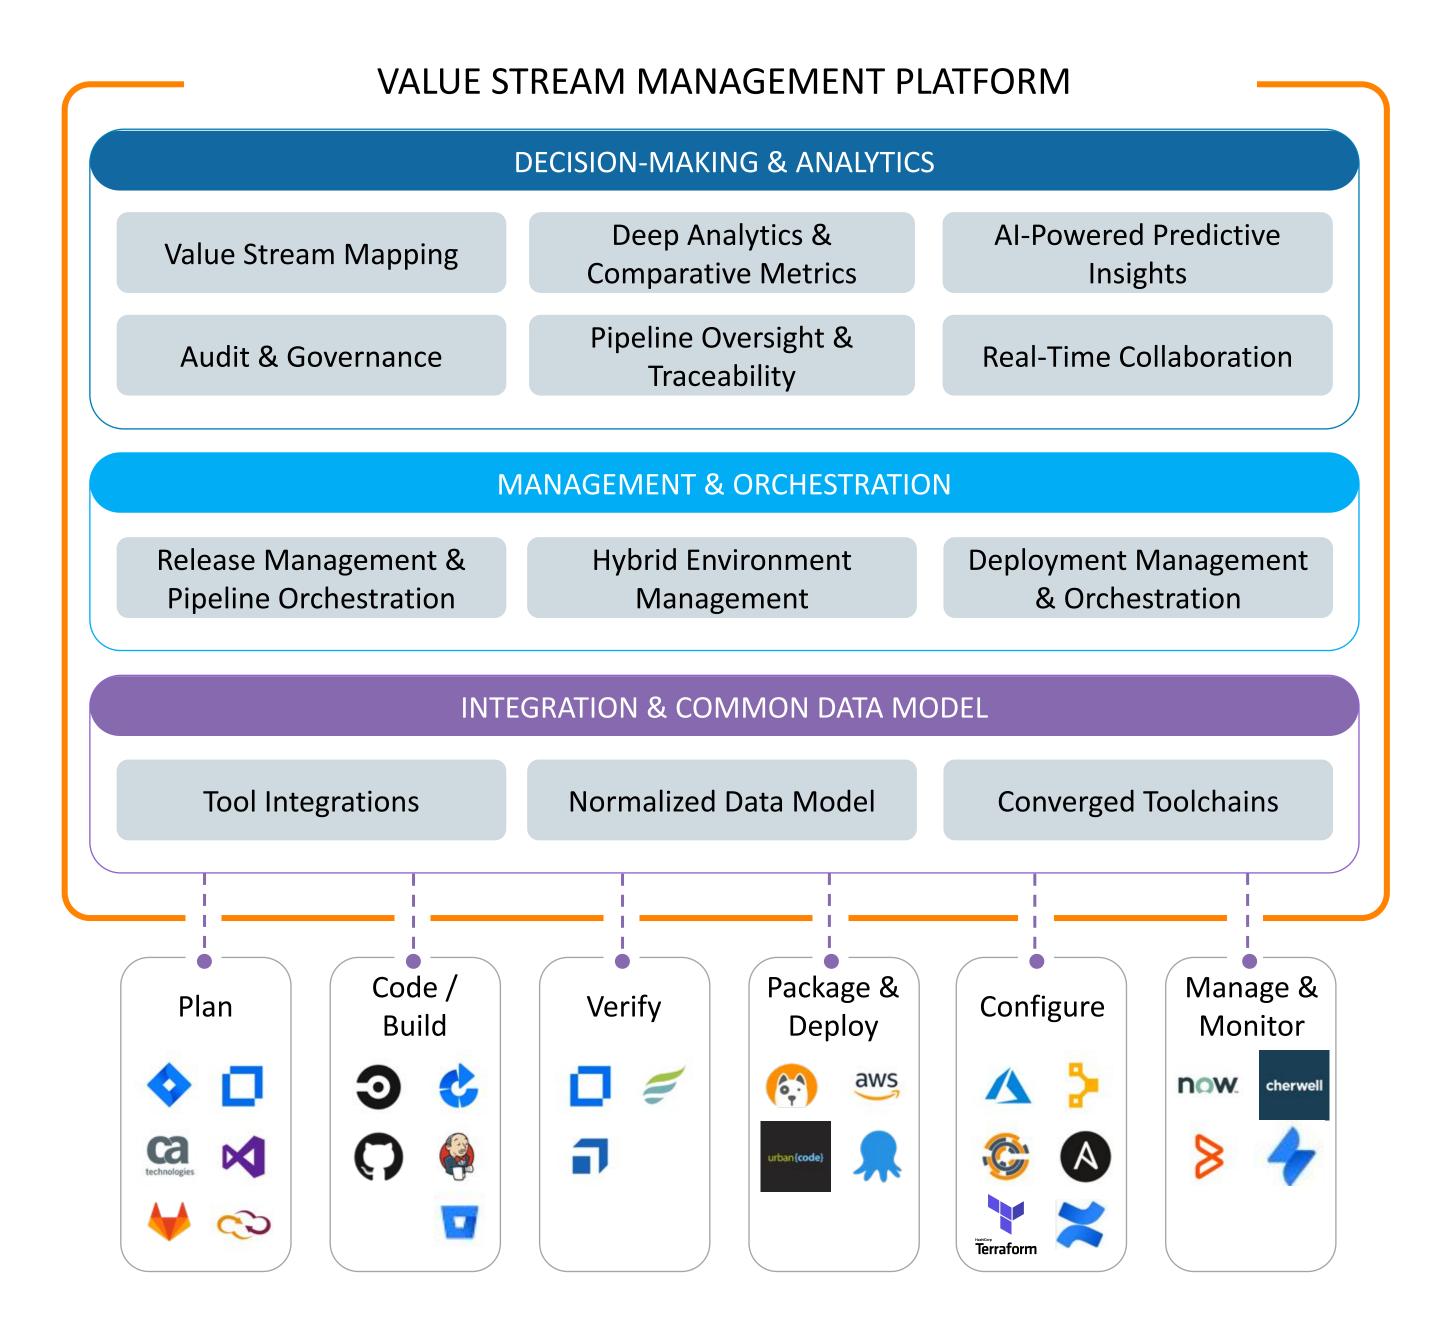

# Value stream management

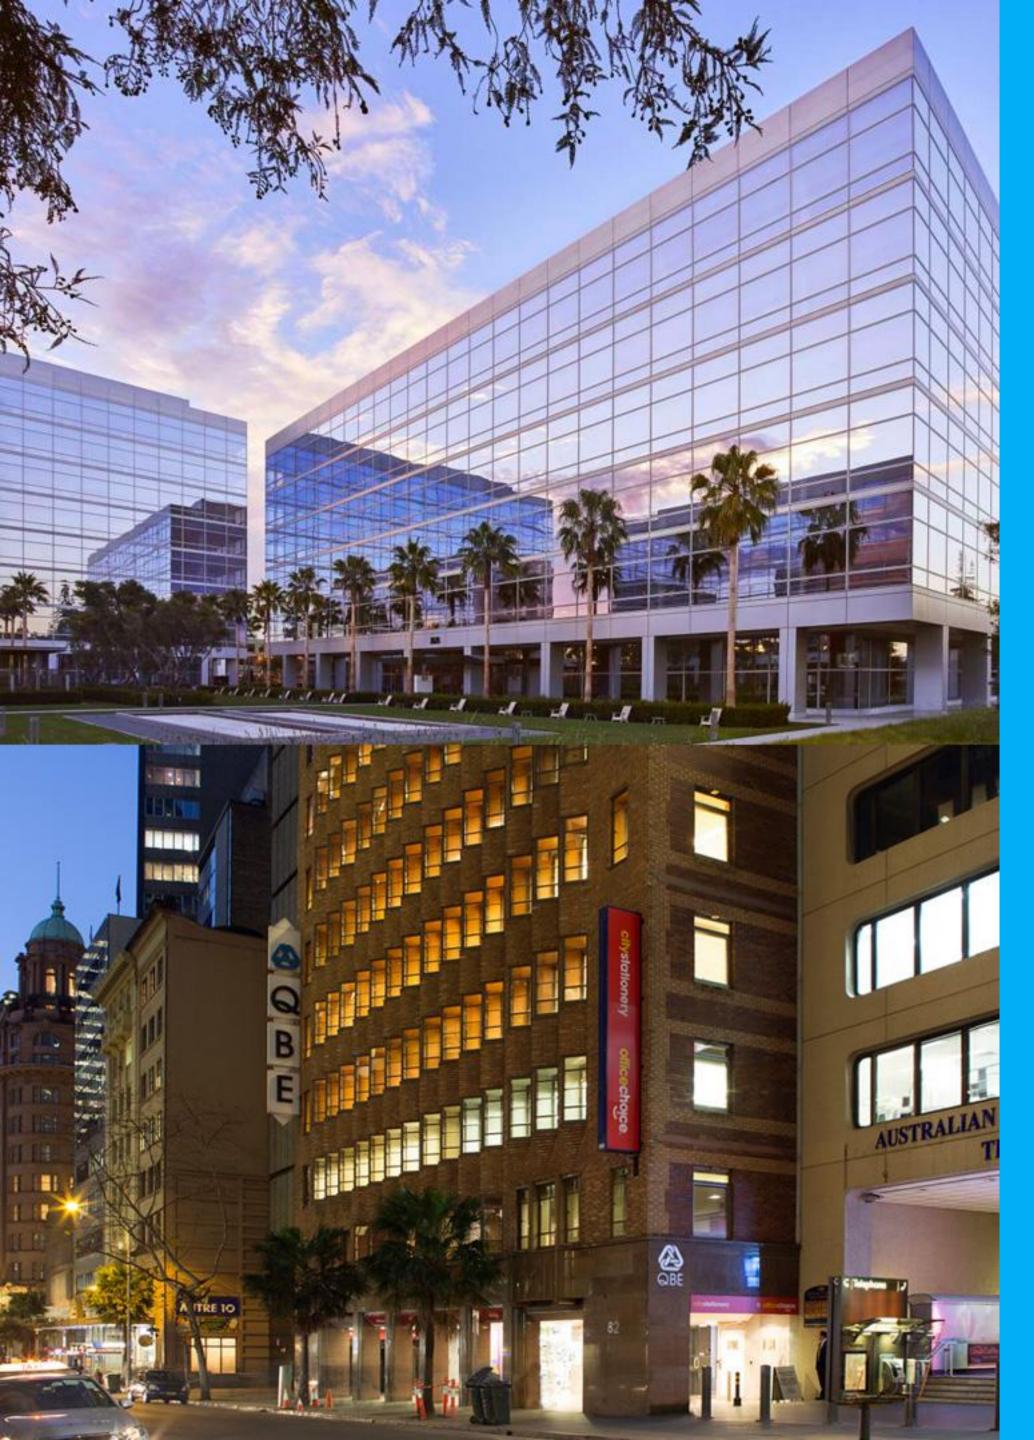

"A combination of people, process, and technology that maps, optimizes, visualizes, and governs business value flow through heterogeneous enterprise software delivery pipelines."
-Forrester Research
